

Create with Emotion Blocks

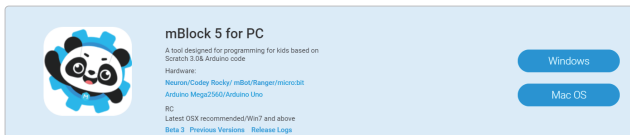

Use new emotion blocks to make Codey Rocky
naughty, happy or angry.

Add the Blocks

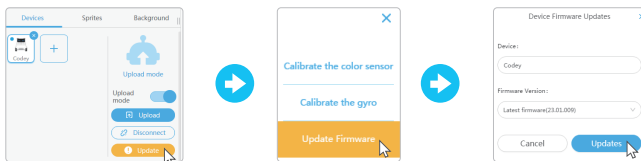

1 Download Software

To download the latest version of mBlock, please visit: <http://www.mblock.cc>

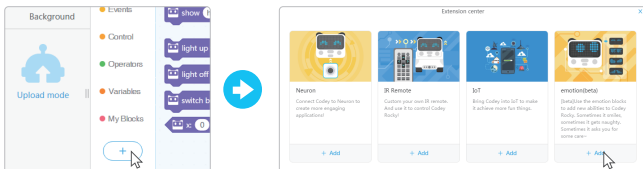

2 Update Firmware

Connect Coddy Rocky to your computer via the USB cable. Open mBlock 5 and connect your device. Then follow the instructions below to update the firmware.

3 Add the Emotion Blocks

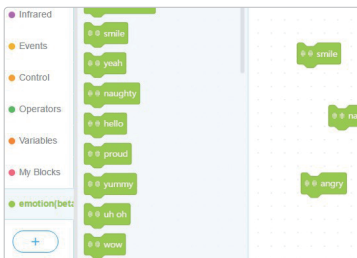

Add the emotion blocks from the extension center.

Example

1 Drag the Emotion Blocks

Drag the emotion blocks to the script area.

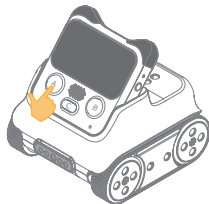

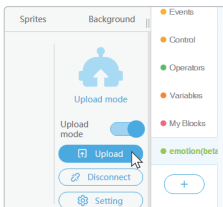

2 Add the Event Blocks

Add the **when button A is pressed** block to the previous blocks. You can reset the button. This is how your program should look like:

3 Upload the Program

Upload the program to Codey and press the button A/B/C to see what happens.

Explore more features
